<b>Clinical Lead</b>	Dr Oisin Brannick, Clinical Lead for North Kensington Recovery Programme
<b>Confidential</b>	No

<b>The Governing Body is asked to:</b>
Note the update on the health response from West London Clinical Commissioning Group (WLCCG) working with the Royal Borough of Kensington and Chelsea working and the NHS, third sector and other partners in the community.

<b>Summary of purpose and scope of report</b>
This month’s report focuses on three key areas: <ul style="list-style-type: none"> <li>• The 1 Year Anniversary</li> <li>• Update on developing the North Kensington Health Recovery Strategy</li> <li>• The North Kensington Recovery Team</li> </ul>

<b>Quality &amp; Safety/ Patient Engagement/ Impact on patient services:</b>
<p>The NHS is keen to make sure that any services we create or expand to support the people affected by the fire are based on what the community tells us they need.</p> <p>NHS West London CCG is clinically-led but community guided, and particularly in light of the strong feelings that still exist in the community, we recognise that there is greater need than ever for active listening and meaningful public accountability that can be evidenced clearly through everything we do.</p> <p>This means that we continue to engage with community representatives, local organisations, faith groups, charities and individuals living in the area on everything we deliver, from signposting materials and public information and collaboration in designing the services themselves. The NHS continues to play an on-going role not only in planning and commissioning services to meet the complex needs of the local community.</p>

<b>Financial and resource implications</b>
We are continuing to work with NHSE to report against trajectories of activity assumptions for 18/19. We have provided month one data and finance reports and are currently working with CNWL to agree our data requirements for month two onwards data and reporting to NHSE.

**Equality / Human Rights / Privacy impact analysis**

None that are relevant to this report

**Risk**

Current data provided by our lead provider requires improvement including capture of requests for additional tasks. This has been discussed with NHSE and revised data will be agreed for month 2 reporting.
